

# IMAGINE THE HOLOPTIC CITY 2038

"A Place Where Eveything Dreams"

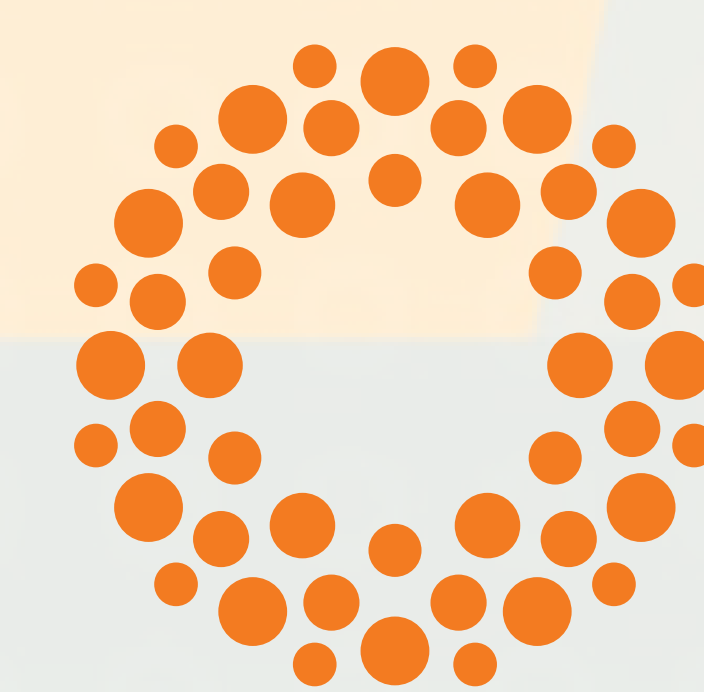

The number of connected Internet of Things devices worldwide will jump 12 percent on average annually, from approximately 30 billion in 2018 to 125 billion in 2030.

12%

By 2030, AI will significantly shift the skills required, notably basic and advanced tech skills (+55%), and social and emotional skills (+24%).

55%

## ORLANDO REGION: CREATING OUR FUTURE

200

By 2022, 200 city regions will pull together innovative funding to transform urban areas and achieve the Sustainable Development Goals.

Life expectancy for both sexes increased from 65.3 years in 1990 to approximately 80 years in 2017, and by 2030, global life expectancy will be close to 90 years.
